FOREWORD

The Northern Scientific Training Program (NSTP) is managed by the Department of Indian Affairs and Northern Development (DIAND) as part of its mandate to foster science and technology in the Canadian North. The Program's aim is to promote interest in northern studies, and provide opportunities for advanced and graduate students to obtain experience and professional training in the North.

This Annual Report provides an overview of Program activities, and a summary of the support for northern studies allocated to Canadian universities during 2001-2002. Please note that the information contained in the Annual Report does not provide details on the specific criteria employed in awarding training funds.

The report also summarizes the major events that shaped the NSTP in 2001. For example, the NSTP Secretariat attended the Annual General Meeting of the Association of Canadian Universities for Northern Studies (ACUNS), which took place at Carleton University, Ottawa, October 25-27, 2001.

In conclusion, I would like to thank the Program's Committee for their dedication and thoroughness during the Annual NSTP Allocation meeting held in February. Moreover, special recognition should be given to the NSTP Secretariat staff. Accordingly, I would like to thank Ms. Sheilagh Murphy, Ms. Rhonda Turner, and Ms. Nathalie Robillard for their sustained hard work.

PROGRAM OVERVIEW

PROGRAM DESCRIPTION

The purpose of the Northern Scientific Training Program (NSTP) is to support Canadian universities in providing training that gives advanced and graduate students the opportunity to gain professional experience in the Canadian North and encourages them to develop a commitment to northern work. The Program objective is to increase the number of graduate and other advanced students within Canadian universities who have specialized in some aspects of northern studies and who have northern research experience.

The Program achieves its objectives by encouraging the formation of multi-disciplinary focal points for northern studies within Canadian universities and providing supplementary financial assistance to universities for students to help offset the high cost of specialized studies in the North. This assistance covers costs attributable to a northern research project which involves supervised field experience in the Canadian North. The NSTP also considers applications from students interested in undertaking research in other circumpolar countries (i.e. Greenland, Norway, Sweden, Finland, Russia and Alaska). It is an assistance program and because of its limited funds it cannot provide employment for students or on-going support in the form of general scholarships. NSTP funds must be used to defray transportation costs, living expenses, freight costs and interpreter fees encountered when carrying out the fieldwork portion of their research projects.

PROGRAM ADMINISTRATION

The NSTP is managed by the Department of Indian Affairs and Northern Development. An intergovernmental committee is responsible for reviewing the applications and ensuring the effective use of funds provided to the universities by the Program. The participating universities are responsible for disbursing the funds to awarded to assist advanced students in gaining supervised northern experience and training in the North.

The NSTP Committee makes major Program policy decisions and all granting decisions. The members are appointed by the Deputy Minister of Indian Affairs and Northern Development. Participating universities are invited to help set direction for the Program at the annual meeting of the Association of Canadian Universities for Northern Studies (ACUNS), during visits to individual universities by the Program Secretariat, and on other occasions. This process facilitates annual Program refinements in response to changing needs and evolving circumstances.

REPORT ON 2001-2002 ACTIVITIES

PROGRAM ACTIVITIES

In addition to on-going administrative tasks, including refinements to the Program Guidelines and the preparation of the Annual Report and Bibliography, the following points highlight the major activities coordinated by the Program Secretariat during 2001-2002.

NSTP Committee Membership

Presently, the NSTP Committee has 15 members, comprised of representatives from federal departments and agencies with an interest in northern scientific activities, the Government of Yukon and the Aurora and Nunavut Research Institutes. The Association of Canadian Universities for Northern Studies is represented as a non-voting member of the Committee and provides an additional linkage between universities and the NSTP. Appendix I lists the membership of the Northern Scientific Training Program Committee during 2001-2002.

NSTP/Northern Studies Promotion

During the past year, the Program Secretariat continued to collaborate with the Association of Canadian Universities for Northern Studies in promoting the vital and growing role of universities in northern research, and the role of the NSTP in support of university development of scientific expertise in the North.

The 2001 research year marked the 40th Anniversary of the Northern Scientific Training Program. To commemorate this event, an article was printed in the DIAND Newsletter, *Intercom*. This article was also sent to all NSTP universities.

Malcolm Ramsay Memorial Award

In order to honour Malcolm Ramsay's contribution to northern research, the NSTP Committee unanimously agreed to select a student project each year from the NSTP applications received for a Memorial Award.

Ramona Maraj, University of Calgary, was the first recipient of the Malcolm Ramsay Memorial Award, for her project "Evaluating the ecological consequences of land-use options on grizzly bears" carried out in the 2001-2002 fiscal year. The Award consists of a $1000 being added to the NSTP grant.

Annotated Bibliography of Publications Based on Research Supported by the NSTP

A bi-annual Bibliography of abstracts for publications of research projects conducted in 1999 and 2000 is currently in production. Bibliographical information submitted to the NSTP Secretariat for these research years has been integrated into the Arctic Institute of North America's Arctic Science and Technology Information System (ASTIS).

University Follow-Up

First, it is an established policy of this Program to provide each university with the specific comments arising from our Committee's assessment of applications under the NSTP. This on-going program follow-up with universities is achieved through correspondence, telephone contacts, and visits to individual universities by Program management.

In 2001-2002, the usual format for providing feedback to the universities through correspondence and telephone contacts was maintained with the purpose being to provide each northern studies committee or institute with the NSTP Committee's reaction to its application.

Overview of NSTP Support to Universities During 2001-2002

With respect to a statistical overview of the NSTP's 2001-2002 support to universities, the following briefly summarizes the information gleaned from reports by participating universities on their 2001 research year. The results are summarized in Tables 1 through 7, plus accompanying figures.

In 2001 a total of 30 universities listed in Appendix II undertook northern studies under this Program. The distribution of allocations under the Northern Scientific Training Program by university, 1962-63 to 2001-2002, found in Table 1 and Figure 1, indicates that during its 40 years of existence the Program's contribution to university training in northern studies has totalled $19,243,840.

University participation in the NSTP has generally increased over the years, except for the period spanning 1993 to 1997 where we saw a small decline in the number of universities applying for funds. But in the preceding years, the number of universities applying to the NSTP as well the amounts sought, have greatly increased resulting in universities receiving approximately half of the amount required to operationalise. This year 31 universities requested a total of $1,348,075. in new NSTP funds and were awarded $636,000.

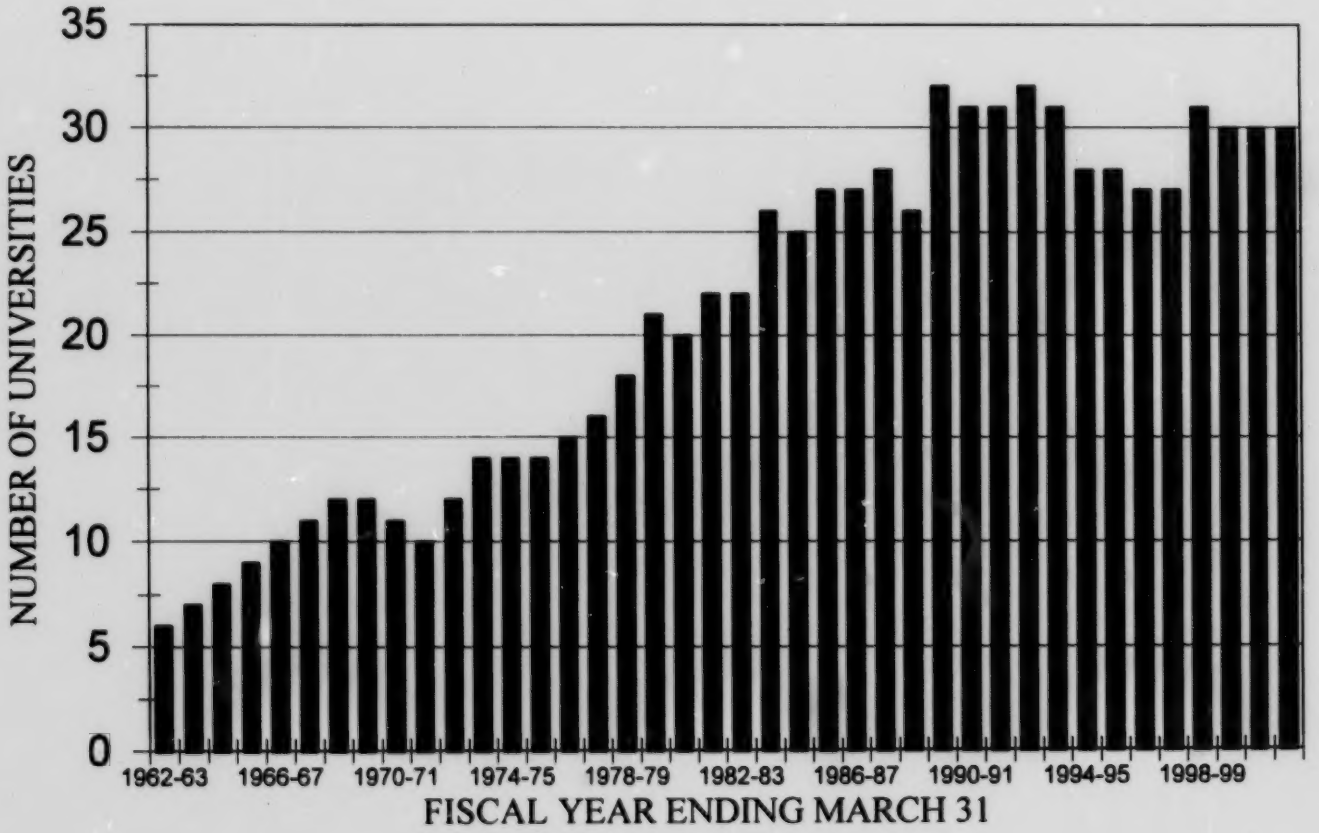
NUMBER OF UNIVERSITIES FUNDED BY YEAR FROM 1962-1963 TO 2001-2002



In Table 2 and Figures 2 and 2.1, a general overview of the distribution of NSTP funds by university for the 2001-2002 research year is provided, revealing that a total of 261 students from 30 universities were supported. The average amount of funds allocated per student was $2,669.14 with the students spending an average of 52.7 days in the North, at an average cost of $50.69 per student/day in the North.

For additional information, summaries of individual projects supported by the Program in 2001 by university are provided in Appendix III. These should prove to be a good point of reference for future collaboration in northern research between university scholars, northern experts and residents of the North.

2002-2003 UNIVERSITY FUNDING REQUESTS

For 2002-2003, 30 universities requested a total of $1,306,943.99 in support of 326 students for an average allocation of $4,009.03. Table 8 provides the distribution of the final allocations under the Northern Scientific Training Program by university for 2002-2003, totalling $636,000 for 30 institutions. The allocation of the training funds by the Northern Scientific Training Program Committee was made on the basis of an in-depth assessment of each application according to the following criteria:

1. extent to which the application fits with Program criteria;

2. evaluation of past performance and up-coming plans; and

3. the training component of the application and the contribution to the development of northern specialists at the university.

In addition, the Committee considered the number of students supported by the Program in the previous year, the number of students proposed for funding in the upcoming year, and the general completeness and clarity of the information provided in each application.

AVANT-PROPOS

Le ministère des Affaires indiennes et du Nord canadien gère le Programme de formation scientifique dans le Nord (PFSN) dans le cadre du mandat qu'il a de promouvoir les sciences et la technologie dans le Nord canadien. Le PFSN vise plus particulièrement à stimuler l'intérêt pour les études nordiques et à donner aux étudiants de premier, de deuxième et de troisième cycle l'occasion d'acquérir de l'expérience et de la formation professionnelle dans le Nord.

On trouvera ici un aperçu des activités du Programme ainsi qu'un sommaire de l'aide financière accordée en 2001-2002 aux universités canadiennes pour des études nordiques. Il faut noter que ce rapport ne contient pas de précisions sur les critères régissant la ventilation des fonds de formation.

En outre, les principaux événements qui ont eu un impact sur le PFSN en 2001 sont récapitulés dans le rapport. Comme par exemple, la rencontre annuelle de l'Association universitaire canadienne d'études nordiques (AUCEN) tenue à l'université Carleton, à Ottawa, du 25 au 27 octobre 2001.

En guise de conclusion, j'aimerais remercier les membres du Comité du PFSN de leur dévouement ainsi que de leur travail minutieux durant la réunion annuelle d'allocation des fonds qui s'est déroulée au mois de février dernier. Je tiens aussi à souligner le travail assidu du Secrétariat et à remercier Mmes Sheilagh Murphy, Rhonda Turner et Nathalie Robillard.

scientifique dans le Nord

APERÇU DU PROGRAMME

DESCRIPTION DU PROGRAMME

Le Programme de formation scientifique dans le Nord a pour but de venir en aide aux universités du Canada afin qu'elles puissent offrir de la formation permettant aux étudiants avancés de premier, de deuxième et de troisième cycle d'acquérir de l'expérience professionnelle dans le Nord canadien, et de les encourager à s'intéresser et à s'engager envers des études nordiques. L'objectif du Programme est en effet d'accroître le nombre de ces étudiants inscrits à des universités canadiennes qui se spécialisent dans une dimension ou l'autre des études nordiques et qui ont de l'expérience de la recherche dans le Nord.

Le PFSN atteint ses objectifs en favorisant la création de centres multidisciplinaires d'études nordiques dans les universités canadiennes et en fournissant à celles-ci de l'aide financière supplémentaire afin d'aider à défrayer les frais élevés engagés par les étudiants en rapport avec leurs études spécialisées dans le Nord. Plus particulièrement, les frais additionnels des projets nordiques qui comportent des travaux supervisés sur le terrain. Le PFSN accepte également les demandes des étudiants qui aimeraient entreprendre des travaux de recherche dans d'autres pays circumpolaires (c.-à-d., Groenland, Norvège, Suède, Finlande, Russie et Alaska). Comme c'est un programme d'aide et comme les budgets sont restreints, on ne peut payer de salaire aux étudiants ni leur offrir de l'aide continue sous forme de bourses d'études. Les montants versés doivent servir à défrayer les coûts excédentaires reliés aux frais de transport de l'étudiant et du matériel ainsi qu'aux frais de subsistance et de traduction.

ADMINISTRATION

Le ministère des Affaires indiennes et du Nord canadien (MAINC) gère le PFSN. Plus particulièrement, un comité interministériel est chargé d'évaluer les demandes et d'assurer le bon emploi des fonds dispensés aux universités. Celles-ci doivent s'en servir pour aider les étudiants inscrits à un programme de baccalauréat, de maîtrise ou de doctorat à acquérir, de façon supervisée, de la formation et de l'expérience spécialisée du Nord.

Le Comité du PFSN, dont les membres sont nommés par le sous-ministre des Affaires indiennes et du Nord canadien, prend les décisions en matières de politique et toutes les décisions au sujet des subventions. On invite les universités à participer à l'orientation du Programme lors de l'assemblée annuelle de l'AUCEN, à l'occasion des visites de membres du Secrétariat et à d'autres moments. Ces interventions facilitent la modification annuelle du PFSN en fonction de l'évolution des circonstances et des besoins.

COMPTE RENDU DES ACTIVITÉS DE 2001-2002

ACTIVITÉS

Voici un survol des principales activités coordonnées par le Secrétariat en 2001-2002, sans compter le travail administratif lié à la modification du Programme et à la préparation du rapport annuel.

Membres du Comité du PFSN

Le Comité compte actuellement 15 membres, soit des représentants des ministères et organismes fédéraux qui s'intéressent aux travaux scientifiques dans le Nord, du gouvernements du Yukon et des deux institues sur la recherche nordique; Aurora et Nunavut. L'AUCEN est aussi représenté sur le Comité en tant qu'observateur et il assure un lien continu entre les universités et le PFSN. On trouvera à l'appendice I la liste des membres actifs de 2001-2002.

Promotion du PFSN et des études nordiques

Au cours de l'année écoulée, le Secrétariat a continué de collaborer avec l'AUCEN afin de promouvoir le rôle essentiel – et grandissant – des universités dans les recherches nordiques et celui du Programme en ce qui a trait au soutien des activités d'universités qui favorisent le développement des connaissances scientifiques sur le Nord.

L'année de recherche 2001 marque le 40e anniversaire du programme de formation scientifique dans le Nord. Pour commémorer cet événement, un article a été publié dans le Bulletin d'informations du MAINC, *Intercom*. Cet article a aussi été envoyé à toutes les universités du PFSN.

Prix commémoratif Malcolm Ramsay

Pour rendre hommage à la contribution de Malcolm Ramsay à la recherche nordique, le Comité a unanimement convenu de remettre un prix commémoratif à un projet d'étudiant choisi parmi les formulaires de mise en candidature reçues au PFSN.

Ramona Maraj de l'université de Calgary était la première récipiendaire du prix commémoratif Malcolm Ramsay pour son projet " Evaluating the ecological consequences of land-use options on grizzly bears". Le prix consiste en un montant de $1000 à être ajouté à la subvention du PFSN.

Bibliographie annotée des publications découlant de recherches subventionnées dans le cadre du PFSN

La bibliographie bi-annuelle du PFSN recueillant le résumé des publications issues de la recherche effectuée en 1999 et 200 est présentement en production. De plus, toute l'information bibliographique soumise au PFSN, fut intégrée au Système d'information sur les sciences et les techniques de l'Arctique (communément appelé ASTIS) de l'Institut Arctique de l'Amérique du Nord.

Suivi à l'intention des universités

D'abord, le Programme a comme politique bien établie de fournir à chaque université les commentaires particuliers émanant de l'évaluation par notre Comité des demandes présentées au PFSN. Ce suivi continu du programme auprès des universités se fait par correspondance, appels téléphoniques et visites aux universités par les représentants du Programme.

En 2001-2002, le processus habituel de rétroaction aux universités par correspondance et appels téléphoniques a été maintenu dans le but de fournir la réaction du Comité du PFSN à la demande faite par chaque comité ou institut d'études nordiques.

APERÇU DE L'AIDE FINANCIÈRE VERSÉE AUX UNIVERSITÉS EN 2001-2002

On trouvera ci-après un sommaire de données statistiques et autres sur l'aide du PFSN en 2001-2002. Produites à partir des rapports des universités sur leurs travaux de recherche de 2001, elles sont présentées plus en détail dans les tableaux 1 à 7 et dans les figures correspondantes.

En 2001, 30 universités (appendice II) ont réalisé des études nordiques avec l'aide du Programme de formation scientifique dans le Nord. Comme l'indiquent le tableau 1 et la figure 1, le PFSN a attribué 19 243 840 $ pour la formation universitaire en sciences nordiques au cours de ses 39 années d'existence, de 1962-1963 à 2001-2002.

À travers les années, la participation des universités dans le PFSN n'a fait qu'augmenter, sauf pour une courte période de 1993 à 1997 où il y eu un léger déclin dans le nombre d'universités faisant une demande de subvention. Mais depuis les deux dernières années, le nombre d'universités participant au PFSN ainsi que les montants demandés ont grandement accru de façon à ce que les universités faisant une demande au PFSN ont reçu de façon générale, la moitié des montants convoités. Cette année, 31 universités ont demandé un total de 1 348 075 $ au PFSN et ont été allouées 636 000$.

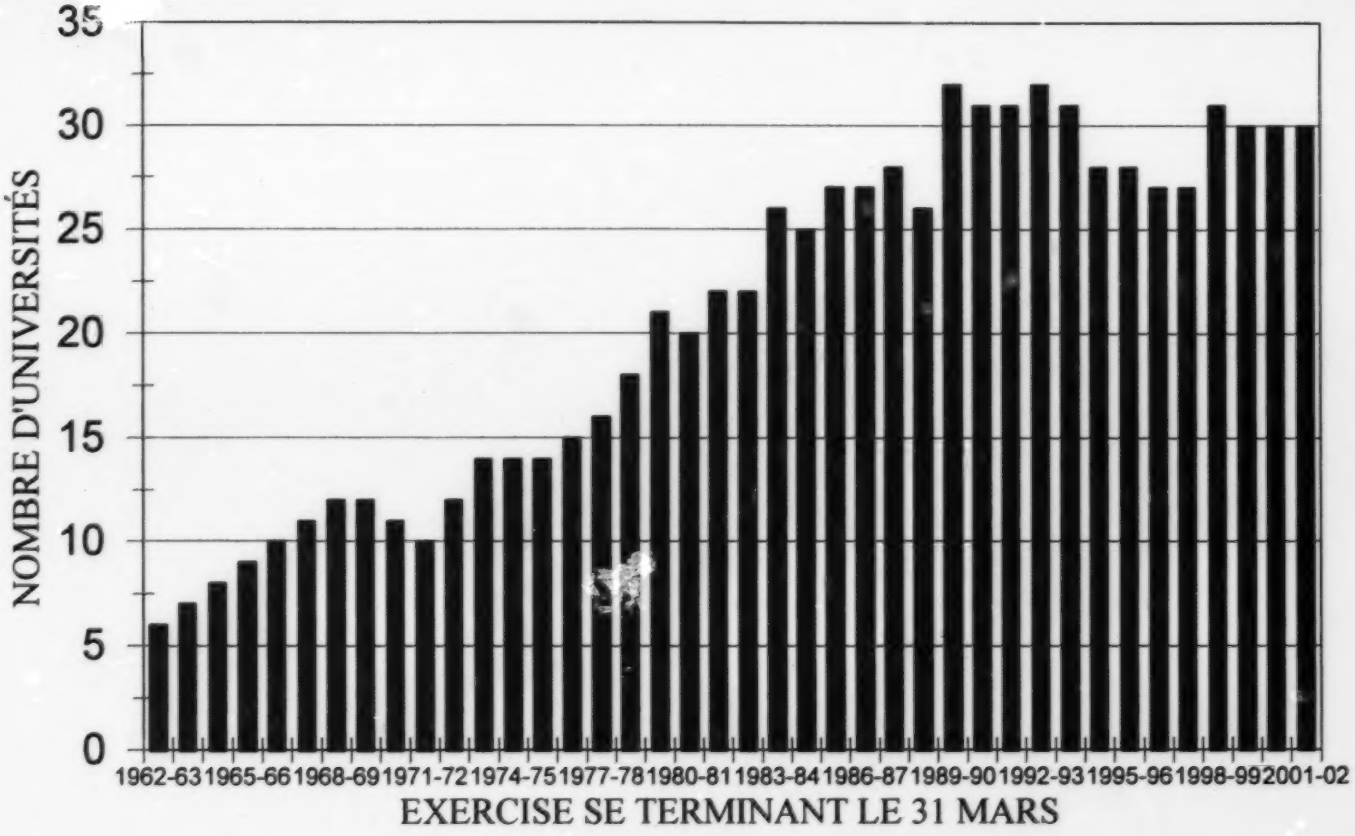
NOMBRE D'UNIVERSITÉS SUBVENTIONNÉES DE 1962-1963 À 2001-2002



Le tableau 2 et les figures 2 et 2.1, qui donnent une vue d'ensemble de la répartition générale des fonds du PFSN en 2001-2002, révèlent que 261 étudiants de 30 universités ont bénéficié de l'appui du Programme. En moyenne, chacun a reçu 2 669.27 $ et a passé 52.7 journées dans le Nord, ce qui donne un coût moyen de 50.69 $ par journée-étudiant dans le Nord.

Passons à la répartition par université et par zone géographique. Comme l'indiquent le tableau 6 et la figure 6, le Nunavut vient en premier lieu (41.7 pour-cent) ensuite vient le Yukon à 17.8 pour-cent contre les T.N.O à 13.6 pour-cent, suivi du Nord du Québec à 12.8 pour-cent. Voici les pourcentages restants : régions septentrionales des provinces sauf le Québec à 7.9 pour-cent, le Nord du Québec, 5.5 pour-cent et les pays circumpolaires à 0.7 pour-cent.

Pour plus de renseignements, voir à l'appendice III les sommaires des projets subventionnés en 2002. Nous osons croire qu'ils constituent de bons points de référence pour les universitaires, les experts en nordicité et les habitants du Nord canadien en rapport avec la collaboration dans le cadre de projets nordiques à venir.

NOMBRE TOTAL D'ÉTUDIANTS :

DEMANDES DE SUBVENTIONS DES UNIVERSITÉS 2002-2003

Pour l'année 2002-2003, 30 universités et un collège ont demandé un total de 1 306 943,99 $ en subventions pour un total de 326 étudiants, ce qui représente une moyenne de 4 009,03$ par étudiant. Le tableau 8 indique la répartition finale des fonds attribués aux universités dans le cadre du PFSN pour 2002-2003, qui totalisaient 636 000,00 $ pour 30 organismes. Les fonds du PFSN ont été distribués par le Comité par suite d'une évaluation approfondie de chaque demande en fonction des critères suivants :

1. la concordance entre les demandes et les critères d'admissibilité du programme;

2. l'évaluation des travaux antérieurs et des plans pour les recherches à venir; et

3. la mesure dans laquelle les projets des universités doivent permettre aux participants d'acquérir de la formation et de devenir des spécialistes des études nordiques.

En outre, le Comité a tenu compte du nombre d'étudiants aidés financièrement dans le cadre du programme l'année précédente, du nombre d'étudiants faisant l'objet d'une demande pour l'année à venir ainsi que de l'exhaustivité générale et de la clarté des informations fournies avec les demandes.
